OLYMPUS
LOCK, INC.
The cabinet lock innovators.

FOR IMMEDIATE RELEASE

SEATTLE, WA — Olympus® Lock, Inc. announces the addition of a new product to its line of innovative pin tumbler cabinet locks—the new Olympus 920LM/DM Series cam lock to accept Schlage®-compatible large format interchangeable cores. The 920LM/DM Series may be used with: Schlage Quad, Numbered Section, Schlage Classic, Schlage Primus or Schlage Everest large format IC cores, Keymark IC cores, and Mul-T-Lock IC cores.

The Olympus 920LM/DM IC core cam lock will directly retrofit our standard 720LM/DM Series small format IC core cam lock. The 920LM/DM may be purchased in either US26D or US3 finish and is sold less core.

Key-retaining or non key-retaining functions, as well as the ability to lock left, right, up or down, can be obtained through the various cams and shifters that are shipped standard with the product. The same cams and shifters that work with our 720LM/DM cam lock will also work with the new 920LM/DM Series lock. This product also includes standard in the package our anti-rotation plate for a more secure installation in particleboard and a plastic actuator to functionally test the lock without a core. The new 920LM/DM Series cabinet locks are available for immediate shipment.

Olympus Lock is a manufacturer of easily rekeyable, pin tumbler cabinet locks and interchangeable core cabinet lock bodies for a broad range of commercial applications. Our mission is to create pin tumbler cabinet locks and accessories of unparalleled innovation, quality, keyway compatibility, and value in a manner which sets a new industry standard for excellence. *Olympus Lock—we make the changes that change the industry.* For more information contact us toll free at 800-525-0954 or visit our website at www.olympus-lock.com.
