FOR IMMEDIATE RELEASE

OLYMPUS LOCK ANNOUNCES REKEYABLE FILE CABINET LOCK FC10 Series pin-tumbler, file-cabinet lock for HON® brand vertical file cabinets

LYNNWOOD, WA (May 1, 2009) — Olympus® Lock, Inc. announces the addition of the newest member in our line of innovative pin tumbler cabinet locks—the FC10 Series pin-tumbler, file cabinet lock replacement kit for HON F24/F28 rotate (cam lock) style file cabinet locks. In keeping with the rest of our product line, this innovative product incorporates features which make rekeying fast and easy. It is the only “pin-tumbler” lock for HON vertical file cabinets and is a direct replacement for HON F24/F28 style locks. “Over the

years, we’ve had many requests for a pin-tumbler file cabinet lock that works with the most common vertical files manufactured by HON,” says Mike Donohue, Olympus Lock’s Director of Sales. “Our new FC10 Series file cabinet lock kit will definitely be well received by those locksmiths that do file cabinet service work and will make their jobs much easier. The features we’ve incorporated into this product are a direct result of input from locksmiths who do this type of work on a regular basis.”

The Olympus FC10 is a direct retrofit for the HON F24/F28, but with the added benefits of pin tumbler security, easy rekeyability and optional ring number package. This unique number ring package allows the key code to be stamped on a replaceable face ring instead of the face of the lock, providing additional flexibility when rekeying locks because the key code is not permanently stamped on the face of the lock. The number ring can be removed and replaced with a new number ring containing the current key code. Additionally, the number can also be used with our T37, DCN and DCR series cam locks.

The FC10 is available in a US26D (626) finish and utilizes the National D4291 (4-pin) and D4292 (5 pin) keyway. Olympus will stock the locks keyed different, in four stock keyed alike groups, or custom keyed to your specifications. Locks may be purchased through Olympus Lock’s network of distributors and will be available for purchase fourth quarter 2009.

Olympus Lock is a manufacturer of easily rekeyable, pin tumbler cabinet locks and interchangeable core cabinet lock bodies for a broad range of commercial applications. Our mission is to create pin tumbler cabinet locks and accessories of unparalleled innovation, quality, keyway compatibility, and value in a manner which sets a new industry standard for excellence. *Olympus Lock—we make the changes that change the industry.* For more information contact us toll free at 800-525-0954.
