LOCK, INC.

The cabinet lock innovators.

FOR IMMEDIATE RELEASE

SEATTLE, WA — Olympus® Lock, Inc. announces additional functionality for one of our core products—our N078 pin tumbler cabinet lock. This lock has been traditionally available in only a drawer version and with a 1-1/8" barrel length. Now, we have added the additional functionality of a door version to the N078 product line.

The N078 will be offered in left-hand door or right-hand door function and will be field reversible between LH and RH for even more versatility. In addition to the door functionality, we are also extending the product line to include a 1-3/8" barrel length version of this lock in both door and drawer versions. These new N078 items are expected to be available for purchase in early 2005.

Olympus Lock is a manufacturer of easily rekeyable, pin tumbler cabinet locks and interchangeable core cabinet lock bodies for a broad range of commercial applications. Our mission is to create pin tumbler cabinet locks and accessories of unparalleled innovation, quality,

keyway compatibility, and value in a manner which sets a new industry standard for excellence. *Olympus Lock—we make the changes that change the industry.* For more information contact us toll free at 800-525-0954 or visit our website at www.olympus-lock.com.
